

264521 RECON Chevrolet LED Fog Light Install

Thank you for purchasing part 264521BK to replace your OEM fog lights. Our light will operate as a fog light, as an amber turn signal and also has high beam function. If you choose to use our light solely as a fog light then simply replace your OEM light and connect the main fog light plug to your truck's vacant bulb socket. If you would like to use all of the functions of your new RECON fog light then follow the diagrams below.
